

Posters

- 1 Hamish Patten **Alpha particle transport in HELIAS and DEMO reactor configurations with 3D free boundary magnetic equilibria**
- 2 Madhusudan Raghunathan **Simulation of bootstrap current in 3D ideal and stochastic magnetic fields**
- 3 Alberto Marcus **Convective radial energy flux due to resonant magnetic perturbations**
- 4 Lukáš Kripner **Predicting ELM heat flux structures in RMP fields using a GPU accelerated LOCUST code**
- 5 David Ciro **Modeling non-stationary non-axisymmetric heat patterns in DIII-D tokamak**
- 6 Michael Faitsch **Infrared Diagnostic Optimisation for Divertor Heat Load Measurements with Magnetic Perturbation in ASDEX Upgrade**
- 7 Yu Gao **Recent studies on pre-ELM structures at JET with applied $n = 2$ magnetic perturbation fields**
- 8 Matěj Peterka **Strike point splitting measurements during the magnetic perturbation experiments on the COMPASS tokamak**
- 9 Philipp Drews **Measurement of plasma edge profile on W7-X**
- 10 Tomas Markovič **Measurements of plasma response field to magnetic perturbations on the COMPASS tokamak**
- 11 Yao Yang **Experimental observation of plasma response to $n=1$ RMP on EAST**
- 12 Li Li **Screening of external magnetic perturbation fields due to sheared flow**
- 13 Dominik Brida **First EMC3-Eirene simulations of an ASDEX Upgrade discharge with Magnetic Perturbations including plasma screening effects**
- 14 Wei Zhang **Edge ICRF fields induced drifts in ASDEX Upgrade**
- 15 Valentina Nikolaeva **Dependence of poloidal asymmetries of the edge turbulence on the magnetic configurations in ASDEX Upgrade**
- 16 Madalina Vlad **Stochastic and quasi-coherent aspects in test particle statistics and their effects on turbulence evolution**

Posters

- 17 Florin Spineanu **Balance of magnetic stochasticity and plasma rotation, with effect on instabilities**
- 18 Christopher Albert **Evaluation of toroidal torque by external magnetic perturbations in resonant transport regimes within Hamiltonian theory**
- 19 Elizaveta Kaveeva **Poloidal and toroidal rotation during the stochastization and pump-out of the plasma edge**
- 20 Qiming Hu **Influence of resonant magnetic perturbations on plasma density on the J-TEXT tokamak**
- 21 Leonardo Pigatto **Flexible tools for external magnetic field configurations on RFX-mod**
- 22 Andreas Kleiner **Triggering of fast growing secondary resistive MHD modes during sawtooth cycles**
- 23 Cristian Sommariva **Modeling runaway electron dynamics in realistic fields from 3D non-linear MHD disruption simulations**
- 24 Yurii Dumin **3D reconnection of random magnetic fields**
- 25 Anastasiia Lukashenko **Geometry and topology of bifurcations of the potential magnetic field lines in the vicinity of 1st, 2nd and higher-order null points**
- 26 Ibere Caldas **Criterion for the Breakup of Invariant Curves**
- 27 Odotayo Raji Rufai **Excitation of ion-acoustic supersolitons in a magnetized adiabatic plasma in the presence of Tsallis distributed hot electrons**
- 28 Keshav Walia **1) Stimulated Raman scattering of q-Gaussian laser beam in Collisional magneto-plasma**
- 29 **2) Self-focusing of q-Gaussian laser beam in a Collisionless plasma and its effect on the plasma Wave Excitation**
